

CHRISTCHURCH MEDICAL PRACTICE

INFECTION PREVENTION AND CONTROL

KEEPING EVERYONE SAFE!

At Christchurch Medical practice we have a dedicated team who are committed to ensuring all patients and staff are safe from the risk of infection.

The team consists of Marie Geary (Practice Manager), Carole Lambourne (Practice Nurse) and Ann Edwards (practice Nurse).

We review our Infection Prevention and Control Policies annually. These policies are important to support infection prevention and control, to reduce or prevent the incidence of healthcare acquired infections and ensure patient safety and confidence.

In addition to our annual policy review, we complete hand washing audits, clinical setting audits, clinical room audits and aseptic technique audits for nurses and Health Care Assistants (dressing technique).

All staff working within your surgery comply with mandatory training with regards to infection prevention and we are continually reviewing practice and new emerging challenges.

If you have any concerns or feedback we would welcome your thoughts.

Please contact any of the above team or the Practice Manager Directly.
